

# Financial Services:

## A Focus On Client Service

---

Founded in 2013, Garnett Station Partners is a principal investment firm, partnering with experienced and entrepreneurial management teams and strategic investors to build value for its portfolio of growth platforms.

Over many years of working as GSP's outsourced IT department, Altourage has supported the firm with a 'personal touch,' providing technology-related regulatory guidance, day-to-day IT support, and future planning—including a migration to a cloud-based infrastructure that has led to increased business efficiency and allowed for seamless and significant growth.

---

### **An Outsourced IT Department**

“We don't have in-house IT expertise, so we utilize Altourage as an outsourced IT department to implement and maintain our technology infrastructure and resources. Altourage proactively makes recommendations and understands all relevant requirements from a regulatory and investor standpoint.”

### **Personal Service**

“Altourage brings much the same capabilities that you might expect from a larger company, but there is notably a much higher focus on personal service.”

### **A Real Partner**

“As we negotiated for cybersecurity insurance coverage Altourage explained how our IT systems, policies and procedures protected our firm and helped address technical questions as they arose. Altourage's assistance was invaluable throughout the process.”

“The bottom line is that Altourage has been a terrific partner and if we can be helpful in letting potential clients know the kind of service they provide, we are happy to do so.”
