

Financial Services:

Global Security, Compliance & Cloud Management

Prince Street Capital is an investment firm focused on global emerging and frontier markets equities, with offices in New York, Singapore and Hong Kong.

Altourage has been Prince Street’s integrated technology partner for more than a decade, as the company grew from a NYC-based investment manager into a global asset manager. Among other key focuses, Altourage handles the firm’s cloud & infrastructure management, technology compliance protocols and comprehensive cybersecurity efforts.

A Global Practice

“The Altourage team literally handles all our IT needs on a global 24/7 basis, from desktop support and server maintenance to any sort of technology upgrades, implementation, system maintenance, data warehousing, and cloud support. We have offices in North America and in Asia so the fact that Altourage has their own international teams has made a huge difference to us.”

Compliance & Security

“Altourage has been invaluable in helping us with the SEC’s cybersecurity requirements and compliance guidelines. They partnered with our team and our lawyers to work through SEC opinions and implement them. They worked closely with us in drafting our information security policy, our cybersecurity policy, and our instant response plans.”

Cloud Management

“Altourage has already helped us set up a hybrid cloud strategy and they will soon be transitioning us to a public cloud later this year. This move will save us hundreds of thousands of dollars each year in server maintenance alone.”

“Whenever I am asked, I can honestly look anyone in the eyes and tell them how good the quality of Altourage’s work is. I would not hold back or hesitate to recommend them, across the board.”

William Wang COO,CFO / Prince Street Capital Management LLC
