

High Growth / Technology:

Creating the Flexibility to Scale

FOX Rehabilitation is a high-growth entrepreneurial private practice of physical and occupational therapists and speech-language pathologists that provides proactive, clinically excellent and evidence-based treatment interventions to the older adult population.

The company has more than doubled in size over the past four years, adding 1,200 employees, with a plan to hire another 1,000 in the next year. During this time of significant growth, FOX has relied on Altourage to plan and manage its significant IT needs.

A Great Partner

Altourage has been a superior partner for a long time, managing our IT needs from soup to nuts. We like having our dedicated team of Altouragers that we have come to know. They are very easy people to become comfortable with.

Managing Growth

“We have experienced a time of sustained and rapid growth over the past 48 months. This has meant a huge scale of IT resources and the role that they play in our ability to stay connected. As a partner, Altourage has not just grown with us - they have absolutely helped us grow. They have never just focused on what our needs are, today. They are always looking forwards, anticipating what we will need in our next stage of growth.”

Moving to the Cloud

“We were running on-premises data centers and the Altourage team suggested that in order to meet our aggressive goals, including an eventual move to a more SaaS-based offering, we would be better served by a hybrid cloud-based environment. There are increased security concerns with even more data sharing, of course, but we feel very safe knowing that the Altourage team has thought through all of this with us.”

“Perhaps the nicest thing about having Altourage as a partner is their flexibility and the degree to which they are always advocating for us and for our success.”
